

MARINE TRIBUTE PROPOSED LOCATION

Pierre Claeysens Veteran's Tribute Sculpture Project
Santa Barbara Airport Terminal

Schematic
New Airport Terminal
Santa Barbara Airport

The sculpture consists of two wing structures fabricated from laminated float glass.
Each wing consisting of six overlapping bonded glass panels.
The wings are perpendicular to each other forming an archway.
Wings are supported by two fabricated bronze buttresses, which house the LED edge-lighting.
The sculpture is serviced by four walkways, matching the existing hardscape of the terminal plaza.
