

NOTICE OF PUBLIC HEARING PROPOSED CHANGES TO CITY OF SANTA BARBARA WATER RATES FOR FISCAL YEAR 2017

Date: Tuesday, June 14, 2016, 2:00 p.m.
Place: City of Santa Barbara Council Chambers, City Hall
 735 Anacapa Street, Santa Barbara

PROPOSED CITY FISCAL YEAR 2017 WATER RATES

You are receiving this Notice because our records indicate that you are a City of Santa Barbara utility customer.
 If you are *not* a City water customer, please disregard this Notice.

This Notice describes proposed water rate increases and explains how you can participate in the process. The City’s water rate structure is based on a comprehensive rate study that used a rate model to evaluate cost of service, as required by Proposition 218.

Why are water rates increasing?

- This winter’s rainfall brought very little water to local reservoirs and the City remains in an extreme and historic drought condition.
- Due to the drought, the City faces increased costs to provide additional water supplied from desalination, ground-water, and supplemental water purchases conveyed through the State Water Project and Lake Cachuma.
- The City relies on its customers to practice extraordinary conservation to preserve remaining water supplies. The proposed rates assume a 35% reduction from normal water use.
- Adjustments to water rates are necessary to generate revenue to pay for increased costs and financial impacts incurred due to extreme drought conditions.

Will the new water rates cover projected costs?

The proposed water rates are not anticipated to cover all projected costs. The City plans to use reserves to make up the difference between revenue generated and the cost for service, and will postpone capital projects that can be delayed.

How will the proposed changes impact my water bill?

Customers are encouraged to use the online water rate calculator to see how the new rates could impact their bill. The table below shows the maximum water bill for single-family homes based on various levels of usage and a 5/8” meter. The table represents the total bill, which is made up of separate components shown on the next page.

Usage Level	Monthly Usage (HCF)	Existing Bill	Proposed Bill	Difference
Low	4	\$40.29	\$44.06	\$3.77
Moderate	10	\$91.35	\$121.88	\$30.53
High	20	\$216.77	\$296.78	\$80.01

The average single family home uses 9 HCF per month and would see their water bill increase from \$82.84 to \$108.91, reflecting a difference of \$26.07 and an increase of 31%.

Please note, the rates included in this Notice are the highest possible rates that could go into effect July 1, 2016.

Most water bills are made up of two key components: (1) a volumetric charge based on water usage, and (2) a fixed monthly service charge based on meter size. The City's rate structure is designed in accordance with California Urban Water Conservation Council Best Management Practices, which incentivize conservation by limiting the amount of revenue recovered from fixed charges.
