Chair Schwartz opened the public hearing at 1:36 P.M.

The following people spoke in support of the project:

1. David Young, adjacent neighbor
2. Taka Nomura, adjacent neighbor

The following people spoke in opposition to the project or with concerns:

1. Margaret Niehaus, neighbor, expressed concern over the fill grading and high placement of the house and wants to be sure that it fits in with the contour of the neighborhood.
2. Patricia Foley, neighbor, submitted written comments, and expressed concerns with elevating the grade of the site, gentrification of the neighborhood, this lot no longer contributing to the rural atmosphere, and the size of the proposed house and quantity of grading not being compatible with the neighborhood.

With no one else wishing to speak, the public hearing was closed at 1:46 P.M.

Fred Sweeney, Single Family Design Board (SFDB) Chair, stated that the SFDB supported the project with a 3/2 vote. Asked that the Planning Commission look at the context and fabric in which the home sits in terms of three-dimensional forms. It is a neighborhood in transition and the Applicant has taken a reasonable design approach. The proposed house is at the level of the house to the immediate west. The landscaping treatment in the foreground of the project was supported by SFDB.

**MOTION: Jordan/Thompson**

**Assigned Resolution No. 027-14**

Approved the project, making the findings for the Environmental Review and Coastal Development Permit as outlined in the Staff Report, dated October 30, 2014, subject to the Conditions of Approval in Exhibit A of the Staff Report with the following revisions to the Conditions of Approval:

1. Restrict grading, excavation, and transport of fill material to weekdays, Monday-Friday. No Weekends or Holidays.
2. Include standard exterior lighting condition.
3. Change B.4. to begin with, "The Owner shall maintain the required native riparian landscaping..." and pluralize "oak tree" in the second sentence.

The Commission made advisory comments to forward to the SFDB:

1. Minimize the lantern effect of interior lighting.
2. Encourage use of landscaping to soften the perimeter of the site.
3. Review the Southern elevation to better fit in with the topography and soften the appearance of the structure atop the retaining wall.
4. Ensure landscaping meets water-wise requirements for drought tolerance.
5. Include in the record an explanation of why exceeding the maximum guideline FAR is acceptable.
